Sagar Prajapati

Lead Mobile Engineer | React Native & Expo | iOS & Android

Ahmedabad, India +91 875 872 45 53 | LinkedIn | GitHub | Website
sagar.prajapti0201@gmail.com

9+ years of mobile development experience, including 5 years with React Native. Led cross-platform delivery, mobile architecture, payments, analytics, automated testing and CI/CD; initiated Spotlight Android development based on user analytics.

TECHNICAL SKILLS

React Native (5 years) | Expo | TypeScript | JavaScript | Swift | SwiftUI | UIKit | Objective-C | iOS | Android | MVVM | SOLID | REST APIs | GraphQL | Apollo | Core Data | AVFoundation | StoreKit 2 | React Native IAP | Google Play Billing | Stripe | Apple Pay | Firebase Analytics | Crashlytics | Braze | Heap | Datadog | APNs | FCM | AWS SNS | EAS Build | GitHub Actions | Fastlane | Firebase App Distribution | TestFlight | Google Play Console | Maestro | XCTest | XCUITest | Git | Agile / Scrum

WORK EXPERIENCE

08/2024 - Present

Lead Mobile Engineer / iOS Lead
Talent Systems India Pvt Ltd, Ahmedabad, India

Project: Spotlight - UK casting platform for performers and casting professionals, serving 50K+ users.

- Took the initiative to expand Spotlight to Android after studying user analytics, proposed the opportunity and built the Android app from scratch with React Native and Expo.
- Architected and delivered onboarding, authentication, Roles Feed search, filtering and pagination, role details, self-tape/media requests, performer profile features and reusable components.
- Added biometric app lock, push notifications and analytics instrumentation with Firebase Analytics, Crashlytics and Braze to support security and insight into app usage.
- Implemented and improved mobile subscription purchase flows across Apple and Google Play, including renewal/plan-change handling and backend collaboration.
- Established CI/CD with EAS Build and GitHub Actions, separate staging/production configurations, Firebase App Distribution and store delivery; introduced Maestro end-to-end automation.
- Also enhanced the native iOS app and expanded its unit and UI test coverage to 80%.

Technologies used: React Native | Expo | TypeScript | Swift | UIKit | GraphQL | Firebase | Braze | AWS SNS | EAS | GitHub Actions | Maestro

Project: Fast Cast - React Native + Expo mobile application with 20K+ users.

- Working on mobile payment integration and purchase-flow functionality, coordinating with backend services to support reliable transaction handling.
- Contributing to iOS/Android release engineering, build configuration, quality checks and CI/CD delivery processes.

Technologies used: React Native | Expo | TypeScript | Payment Integration | iOS | Android | CI/CD

Project: Casting Networks - US casting and performer platform connecting 1.3M+ registered performers with industry professionals.

- Implemented StoreKit 2 auto-renewable subscriptions, trial and paywall flows, with backend integration for subscription lifecycle events.
- Delivered onboarding, registration and performer journeys; supported notifications, release pipelines and app quality.

Technologies used: Swift | UIKit | StoreKit 2 | Firebase | GraphQL | Push Notifications | GitHub Actions

08/2021 - 08/2024

Senior iOS Developer
All State Solutions, Pune, India

Project: Cadillac Technician - General Motors roadside service application with 10K+ users.

- Developed app functionality from scratch with SwiftUI and MVVM, defining API architecture, location-based notifications and offline job-status updates.
- Wrote network-layer unit tests, achieving 80% coverage, and improved reliability in field workflows.

Technologies used: SwiftUI | Combine | Firebase | REST APIs | Core Data | Datadog | App Center CI/CD

Project: Good Hands Rescue Network - US roadside assistance platform serving 10K+ users.

- Modernized UIKit/Swift features toward SwiftUI and helped bring ownership in-house from an outsourced development team.
- Improved job notifications, observability and quality with Datadog and XCTest; achieved 85% unit-test coverage.

Technologies used: Swift | SwiftUI | RxSwift | Firebase | Core Data | Datadog | XCTest | CI/CD

11/2019 - 08/2021

Senior iOS Developer
TatvaSoft, Ahmedabad, India

Project: TMRO - US music industry networking mobile app with 20K+ users.

- Built key features from scratch using Swift and MVVM, including API integrations, location services, Instagram integration and Stripe payments.

Technologies used: Swift | UIKit | AVFoundation | Core Location | Firebase | Stripe | CI/CD

Project: OtherLevels - Australian enterprise mobile messaging technology serving 130+ clients.

- Created an iOS messaging framework reusable from Flutter; handled Objective-C compatibility fixes and push notification integration.

Technologies used: Objective-C | Flutter | APNs | AWS | Core Data | Fastlane | XCTest

Project: Jahan Money - International money transfer app supporting transfers to 130+ countries.

- Implemented money transfer and mobile top-up features, optimized app performance and integrated Apple Pay payment capabilities.

Technologies used: Swift | Apple Pay | Firebase | REST APIs | Git

09/2016 - 10/2019

iOS Developer
Innopad Solution, Ahmedabad, India

Project: Pelipost - Photos to Prison - US app for photo and letter delivery, serving 500K+ users.

- Developed photo uploads, order history, loyalty/rewards and Stripe checkout; simplified ordering workflows and improved engagement.

Technologies used: Swift | Objective-C | MVVM | Stripe | Sign in with Apple

Project: Family Trail - US family location and travel monitoring app with 5K+ users.

- Built location tracking, geofencing and location-based alerts from scratch as part of a small mobile team.

Technologies used: Swift | Core Location | Geofencing

Project: On Site Location - Stanford University enterprise mobile application.

- Developed the iOS app and location-aware features from scratch in an agile delivery team.

Technologies used: Swift | Core Location | Geofencing

EDUCATION

04/2013 - 06/2016 Diploma in Computer Engineering, Gujarat Technological University, Gandhidham, India
